

OUTREACH PROGRAM, SCOPES AND RELEVANT LINKS

The formal outreach program is scheduled from October 27th EST to December 1st EST. While we will continuously be having conversations with relevant stakeholders within broader scopes without any formal schedule, the outreach program is designed to dedicate a time epoch specifically for outreach purposes.

An important thing to note is that we're not accepting any investment interests or term sheets in a formal and/or legally binding way during the epoch. During the epoch, we'll be thoroughly studying and evaluating mandates via a non-profit initiative we started, Point de Capiton.

Point de Capiton hosts an incredible team that comes from an extensive background in allocation in public finance and has analyzed mandates of thousands of funds and investment vehicles of every tenure and structure.

The evergreen structure of Point de Capiton allows categorizing investment vehicles based on price, time, and mandate preferences to make allocations for core Xenosystems assets and affiliated vehicles, be it core token governing PoS or LP allocation to Xenosystems-specific systematic, venture, and liquid vehicles.

Beware of brokers, dealers, funds, groups, angel collectives, software, or any financial intermediaries offering definitive allocations or commitments in any core Xenosystems products and funds. We're not liable for any such losses incurred.

While not accepting any term sheets, we're formally and informally accepting letters for advocacy, letters for contribution, and letters for allocation in the form of theses, antitheses, and memos.

These will be thoroughly evaluated during the allocation process, and the definitive term sheets will be accepted based on that. Not only term sheets but also contributor acceptance, LP commitments to venture and liquid funds, and other strategic investment, contribution, allocation, and liquidity programs will evaluate these memos to make a formal offer.

To maintain information symmetry and fairness among interested actors, we've put together a formal data room consisting of the deck and the memo. Do not trust any other decks, memos, or links you receive from a third party; we're not liable for such occurrences leading to information asymmetries.

The data room is located at the link below [please maintain the confidentiality standards mentioned in disclosures]:
